Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

The information disclosure statement (IDS) submitted on 2/26/04 has been acknowledged by the examiner. However, PTO-1449 has not been found in the record.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Treyz et al (6,526,335).

As per claim 5, Treyz teaches a communication device establishing a connection to a communication line outside a car to transmit data input through the server over the communication line for receiving results of the communication in form of voice (figures 1, 2, 4, 13). In addition Treyz teaches the moving terminal receiving information, including map or traffic information (column 20, lines 31-38, figures 15 and 29). Regarding the audio, voice-recognition, and voice synthesis, Treyz support these functions in column 13, lines 36-50. Treyz discloses input means for starting the communication device by one operation and establishing communication for the audio interactive server (figures 1 and 2). Treyz discloses the moving terminal device

automatically transmits predetermined information of non-voice (column 15). Treyz does not teach notifying a termination of communication with the moving terminal. However, it would have been obvious to one skill in the art that if no information is needed from the terminal, it will be no communication.

Allowable Subject Matter

3. Claims 6 and 20 are allowed.
